# Installation Instructions for the Swageless Quick-Connect® Cable Hardware.

Using the Cut Gauge Line

Use the Cut Gauge Line on the Quick-Connect® body to locate and mark the cable for proper trim length. This is typically used when attaching the second in a pair of end fittings.
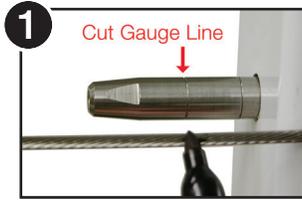

1 — Cut Gauge Line

Stretch the cable tight. Mark with felt pen at Cut Gauge Line.
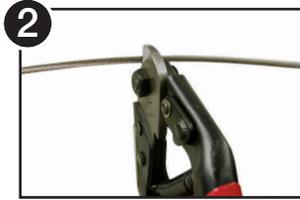

2

Trim cable at the mark.
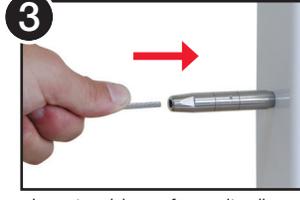

3

Insert cable as far as it wil go into fitting. If cable is too long, remove it using a Release Tool and trim as needed.

4

Quick-Connect® Jaws lock onto cable automatically. Tighten the cable line using the tenson adjustment fitting.

Installing Quick-Connect® Jaw Swivel Turnbuckle

1

Install Jaw onto an eyebolt or eyelet using the removable clevis pin.

2 — Lock Nut — 4X
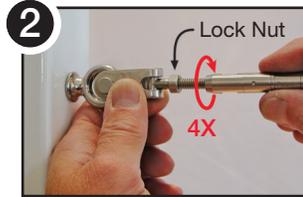

Spin the turnbuckle lock-nut onto the threads. Then attach the Quick-Connect® and rotate the body 4 full turns.
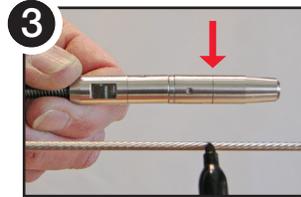

3

Stretch cable tight across fitting and mark at Cut Gauge Line. Cut cable at mark.
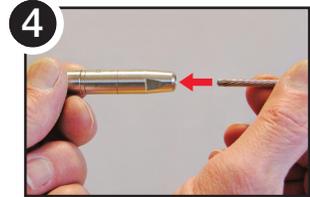

4

Loosen Quick-Connect® 2 full turns and insert cut cable end as far as it will go into the fitting; the jaws will automatically lock on.
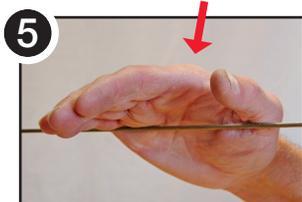

5

Hand tighten the Quick-Connect® as far as possible, then swiftly hit the cable line with your palm several times to ensure that jaws are securely seated.

6

Use 3/8" wrenches to tighten the Quick-Connect® to desired final tension.

7

Tighten the lock-nut against the Quick-Connect® to prevent the fitting from loosening
