# Installation Instructions for the Swageless Quick-Connect® Cable Hardware.

Using the Cut Gauge Line

Use the Cut Gauge Line on the Quick-Connect® body to locate and mark the cable for proper trim length. This is typically used when attaching the second in a pair of end fittings.
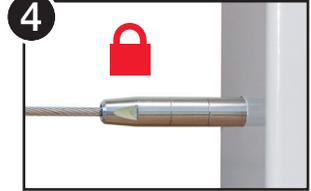

① Stretch the cable tight. Mark with felt pen at Cut Gauge Line.

② Trim cable at the mark.

③ Insert cable as far as it wil go into fitting. If cable is too long, remove it using a Release Tool and trim as needed.

**④** Quick-Connect® Jaws lock onto cable automatically. Tighten the cable line using the tenson adjustment fitting.

Installing the Quick-Connect® Threaded Terminal

① Drill 5/16" hole through your post. Counterbore with 1/2" drill on inside face if embedding Quick-Connect® body.

② Attach washer and nut, leaving room for final tensioning of fitting & cable.

③ Insert cable all the way into Quick-Connect® fitting until it stops. Jaws lock automatically.

④ Tighten the nut to tension the line. Use wrench to prevent the Quick-Connect® from rotating during tensioning.
